A practical question. Do they have parking available? Sheldon

Public Meeting on EPA's Passaic River Cleanup Proposal
Wednesday, May 7 @ 7:00 PM
Portuguese Sports Club, 55 Prospect Street, Newark, NJ

On April 11, 2014, the U.S. Environmental Protection Agency announced a proposed cleanup to remove 4.3 million cubic yards of highly contaminated sediment from the lower eight miles of the Passaic River in New Jersey. The sediment in the Passaic River is severely contaminated with dioxin, polychlorinated biphenyls (PCBs), heavy metals, pesticides and other contaminants from more than a century of industrial activity. The EPA is proposing bank-to-bank dredging – one of the largest volumes ever to be dredged under the EPA's Superfund program – followed by capping of the river bottom.

The EPA will hold three public meetings to explain the proposal.
